CAPE MACLEAR

Lake Malawi National Park is home to an amazing diversity of Mbuna, the dazzling tropical freshwater cichlid fish. The park lies about 60 kilometres north of The Retreat, an easy if somewhat rugged drive. Cape Maclear, a world heritage site, encompasses the Namkumba Peninsula – the promontory that splits this part of the lake into two arms and features various offshore islands. The scenery is a spectacular rocky outcrop rising from deep waters, clad with tropical growth, mountains, sandy beaches & coves, densely wooded islands, sand dunes and reed marshes. Over 800 species of fish have been identified in Lake Malawi, most of which are endemic to these waters. Prolific bird life provides bird enthusiasts and nature lovers with hours of excitement and interest. Here, missionary graves and the site of the first Livingstonia Mission dating back to 1875 can be explored. Full day excursions are inclusive of transfers to and from Cape Maclear and a boat ride from the golden beaches of Cape Maclear by Kayak Africa to either the isolated Mumbo Island or the wild Thumbi Island for the best snorkeling. A picnic lunch on one of these islands and a stop at Monkey Bay curio sellers’ market on the return journey to the Makokola Retreat complete the activities of this day trip.
